SECRET

OBJECTIVES

EXECUTIVE DIRECTION

1965 - 1970-75-80

1. Continue to provide essential security support to Agency operations and activities with increased emphasis on the fields of personnel security, industrial security, technical security and counterintelligence consistent with ever-increasing security requirements imposed upon this Office by other components of the Agency.
2. To be able to provide flexibility to meet crisis situations throughout the world without jeopardizing security programs.
3. To provide improved security services and support at accelerated rates without jeopardizing quality.
4. To obtain sufficient T/O positions overseas as Office of Security slots to assure that needed security protection is afforded at all times.

SECRET

SECRET

OBJECTIVES

ADP

1965 - 1970

1. Besides continuing and improving the existing computer operations for management control of Security Badges, Special Clearances, and Case Processing during the next five years, the Office of Security is programming and converting to machine language certain groups of security information in order to take advantage of the enormous retrieval speed and research potential available in automation facilities at present.

2. During this five year period the Office of Security will continue to participate in the development of automated data processing systems in the Agency and the intelligence community to ensure machine language and systems compatibility for maximum exploitation of all Security and CI information throughout the community.

3. During this five year period, the Office of Security will continue to seek a secure communications link and procedures for the rapid exchange of Security information with other Government agencies in the Name Check Network.

1970 - 1975 - 1980

1. Beyond the five-year period the automation equipment and programming facilities are expected to be of such a complete and revolutionary change as to be impossible to predict accurately today. The Office of Security

ADP

operating plans for the next ten and fifteen years include increasing efforts to exploit the new hardware, software, and operating systems developments as rapidly as feasible. The Office of Security will plan and pursue an active, aggressive, and expanding ADP program to convert its manual data processing and records keeping to automated systems wherever economically feasible and practical.

SECRET

OBJECTIVES
COUNTERINTELLIGENCE

1965 - 1970

1. Continue rapid exploitation of counterintelligence targets of opportunity or new sources which may be developed and to handle highly classified CI projects bearing directly on Agency security.
2. Promote practices and procedures to ensure the timely exchange of pertinent security and counterintelligence information both within CIA and the community for the protection of personnel and installations with emphasis upon overseas activities.

1970-75-80

the period,

1. The above programs will continue during/1970 through 1980.
2. To provide appropriate slotting arrangements in our counter-intelligence Staff to permit adequate training and overlap of persons assigned to CI work as replacements for those very experienced personnel who are about to retire. This is necessary to provide needed continuity in a highly specialized and complex security field.

SECRET

SECRET

OBJECTIVES

PERSONNEL SECURITY

1965-1970

1. Develop uniform security clearance criteria and standards within the intelligence community.

2. Take all steps possible to *Continue to reduce* ~~reduce~~ the amount of time required to security clear individuals.

3. Take necessary steps to assure the reinvestigation of employees on a five-year cycle basis.

4. Reduce the number of personnel security problem cases through increased emphasis to employees of their security responsibilities through Security reindoctrination programs.

5. To continue to develop means and methods to improve the security systems used within the intelligence community.

1970 - 1975

Same as above.

1975 - 1980

Same as above.

SECRET

X

SECRET

OBJECTIVES

POLYGRAPH

1965 - 1970

1. Conduct research into discipline related to technical interrogations in order to develop new polygraph hardware and techniques to further improve the personnel security program of the Agency.
2. Conduct research into validation of the polygraph.
3. In coordination with DD/S&T, conduct of research into stress measurement.

1970 - 1975

25X1

1975 - 1980

Continue research studies in light of new technical developments in the interrogation field.

SECRET

OBJECTIVES

PHYSICAL SECURITY DIVISION

1965 - 1970

1. Conduct security surveys of all overseas installations in Near East, Western Hemisphere and Africa on an annual basis.
2. Assist Department of State in review of plans for construction or major renovation of our embassies and consulates.
3. Monitor developments in field of automation as applied to storage, transmission, handling and reproduction of classified data to provide proper security protection.
4. Conduct complete survey of Agency pouch and courier procedures.
5. Procure and install automated personnel identification and admittance control devices for use at all limited access areas in Headquarters complex.
6. Complete a rebadging program for the Agency.
7. Establish an immediate responsible capability which will place area knowledgeable Security Officers at the disposal of the Chief of Station/ Base in times of emergency.
8. Continue the exploitation of new equipment and techniques that have broad application to the field of physical security to provide greater efficiency of operations and economy in protecting Agency assets both domestic and overseas.

PHYSICAL SECURITY DIVISION

1970 - 1975

1. Establish a capability to maintain a Security Officer generalist and a Security equipment specialist present on a continuing TDY basis in the Near East, Africa and Western Hemisphere areas which will, in effect, constitute regional staff coverage from Headquarters.
2. Construct a pistol range in Headquarters annex building to facilitate training of Agency employees and guards.
3. Expand utilization of automated personnel identification and admittance control devices to include entrance of all buildings in the Headquarters area.

1975-1980

- technological*
1. Maintain constant awareness of ~~technical-logical~~ developments as they apply to storage, handling, transmission, and destruction of Agency classified material. Also keep abreast of opposition penetration techniques ^{physical} and capabilities in order to provide maximum/security protection to the classified operations of the Agency.

SECRET

OBJECTIVES

INVESTIGATIONS AND OPERATIONAL SUPPORT

1965 - 1970

1. Continue improving the methods and techniques of conducting field investigations and reporting procedures so as to cope with an anticipated increase in investigative requirements, particularly in the industrial clearance area as a result of increased activity by other components of the Agency.

2. The five-year program for [] is intended to develop its assets so that it can support fully the industrial security workload both in investigations and security surveys as well as provide cover for other security operations.

3. To assure that personnel and facilities of the Office of Security have the capability of effectively providing operational support to all parts of the Agency as required.

1970 - 1975

1. Under [] the establishment of overseas offices are planned in order to provide cover for security support of overseas operations.

1975 - 1980

1. The fifteen year project for [] will reflect very few changes from the ten year projection other than refinements and improvements in techniques.

SECRET

SECRET

OBJECTIVES

INDUSTRIAL SECURITY

1965 - 1970-75-80

Further improve the industrial security program of the Agency by centralizing control within the Office of Security in order to standardize physical and personnel security procedures of all Agency components and to eliminate duplication of inspections.
